

*Preliminary program*

# *AEROVEHICLES 5*

## *POITIERS 12-14 JUNE 2023*

Monday, June 12	
	<b>Welcome + Opening adress</b> Jacques Borée - Chairman Majdi Khoudeir - Director ISAE-ENSMA 09:00 Virginie Laval - President University of poitiers Fabien Godeferd - DAS CNRS INSIS Gérard Blanchard - Vice-President Research Région Nouvelle Aquitaine Karl Joulain - Director P' Institut
09:20	<b>Invited Talk : Unsteady aerodynamics of Trains and vehicles. Presentation of the DLR test bench and discussion of some recent findings</b> <i>Dr Daniela Heine, German Aerospace Center (DLR)</i>
Session 1: Train 1 (Chair: H. Hemida)	
10:00	Aerodynamic of TGV M <i>Tewfik Benazzouz, Arnaud Latouche-Halle, Eliane Allain</i>
10:20	Investigation of aerodynamic characteristics of a high-speed train in turbulent flow conditions <i>Chao Xia, Ting Guo, Lei Yu, Zhigang Yang</i>
10:40	Aerodynamic drag analysis of high-speed transportation system using OpenFOAM <i>Nan Meng, Jonathan Tschepe, Denes Fischer, Christian Navid Nayeri</i>
11:00	Coffee Break
Session 2: Vehicles Platooning (Chair: A. Kourta)	
11:20	Towards Sustainable Transportation: An Analysis of the Aerodynamic Benefits of Vehicle Platooning Using CFD Simulations <i>Thomas Schumacher</i>
11:40	Prediction Model for Drag Reduction of Truck Platoons <i>Brian Mcauliffe</i>
12:00	The aerodynamic interaction of platooning and overtaking vehicles <i>Sam Marshall, David Soper, Simon Wiggins</i>
12:20	Lunch Break
Session 3: Train 2 (Chair: C. Somaschini)	
14:00	Energy based algorithms to compute the running resistance of trains taking into account the wind velocity. <i>Itziar Bueno Tintoré, Steve Cochard</i>
14:20	Unlocking future rail freight transport capability through vehicle aerodynamics <i>David Soper, Chris Baker, Terry Johnson, Aaron Barrett</i>
14:40	Crosswind studies of high-speed train aerodynamics by large-eddy simulations <i>Matteo Montecchia, Carlos Pérez Arroyo, Jérôme Dombard, Florent Duchaine, Etienne Grappein, Salwa Bouachrine</i>
15:00	SPH simulation of a passenger train plowing through snow <i>Uroš Cvelbar, Jan Viher, Enrique Solano Andres, Sanjin Šarić</i>
15:20	Coffee Break

Session 4: Real Driving conditions ( <i>Chair: J. Borée</i> )	
15:40	On the influence of free-stream turbulence on the aerodynamics of a realistic road vehicle <i>Nicolas Mazellier, Stéphane Loyer, Azeddine Kourta</i>
16:00	On the effect of free-stream turbulence on the wake dynamics of an Ahmed body <i>Pierre-Yves Passaggia, Nicolas Mazellier, Azeddine Kourta</i>
16:20	Ahmed Body Wake and related Performances under Unsteady Flow Conditions <i>Giorgio Moscato, Giampaolo Romano</i>
16:40	Aerodynamics of the square-back Ahmed body under rainfall conditions <i>Nicolas Mazellier, Martin Obligado</i>
17:00	Impact of wind exposure on the traffic of the St Nazaire bridge <i>Sylvain Aguinaga, Michel Aumoitte, Julien Lahaie</i>
17:20	<b>End of first day</b>
<b>Visit of FUTUROSCOPE</b>	

Tuesday, June 13	
09:00	<b>Invited Talk : Simulation and active control of wake bi-modal switching</b> Professor Aimee S. Morgans, Engineering, Imperial College London
Session 5a: Wake dynamics ( <i>Chair: O. Cadot</i> )	
09:40	Topological Analysis of the DrivAer Fastback Wake Bi-Stability <i>Matt Aultman, Lian Duan</i>
10:00	Near wake of an Ahmed body: analysis of switches and base pressure-velocity relationship <i>Stéphanie Pellerin, Berengere Podvin</i>
10:20	Investigation of wake bi-stability behind a more realistic squareback vehicle <i>Sinisa Krajnovic, Xinchao Su</i>
10:40	Effects of upstream turbulence on the bi-stable wake switching behind a square-back Ahmed body <i>Lei Yu , Chao Xia, Yajun Fan, Zhigang Yang</i>
Session 5b: Trains 3 ( <i>Chair: E. Allain</i> )	
09:40	Numerical Modelling of Freight Trains in Tunnels: A Redeveloped 1D Model and Separation Bubble Parameterisation <i>Zhen Liu, David Soper</i>
10:00	Experimental analysis of train slipstream in confined spaces <i>Stefano Negri , Gisella Tomasini, Paolo Schito, Daniele Rocchi</i>
10:20	Analysis of the energy demand of HVAC systems on trains depending on the driving speed <i>Jonathan Tschepe, Christian Navid Nayeri</i>
10:40	Mild crosswind effect on train slipstream <i>Elia Brambilla, Claudio Somaschini, Paolo Schito, Gisella Tomasini , Daniele Rocchi</i>
11:00	Coffee Break
Session 6: Wheels ( <i>Chair: S. Sebben</i> )	
11:20	Investigation of tyre rim protectors on the aerodynamics of a passenger vehicle <i>Erik Josefsson, Francesco Fabio Semeraro , Magnus Urquhart, Simone Sebben</i>
11:40	Model study of wheel-vehicle interactions for fast- and square-back bluff bodies <i>Di Bao , Jacques Borée, Christophe Sicot, Côme Roebroek</i>
12:00	Numerical study of cars wheels aerodynamics: focus on rims increments. <i>Charles Ribes, Matthias Ullrich</i>
12:20	Lunch Break
Session 7: Flow fields and loads ( <i>Chair: C. Nayeri</i> )	
14:00	Aerodynamic Side Loads on Cyclists induced by Vehicles in Overtaking Maneuvers <i>Christof Gromke, Bodo Ruck</i>
14:20	Spatio temporal characteristics of turbulent separation around a simplified on-road vehicle with different leading edge shapes <i>Amir Sagharichi , Mark Francis Tachie</i>
14:40	Influence of ground clearance and Reynolds number in the near-wake of a square-back Ahmed body through hot-wire anemometry. <i>Edwin Duran Garcia, Frédéric Murzyn , Karthik Depuru Mohan , Mark Finnis, Kevin Knowles</i>

15:00	Effect of the ground floor on the flow separation around a vehicle model <i>Amir Teimourian, Nico Pohlen, Philippe Gilotte , Hatem Touil, Navid Nayeri</i>
15:20	Tomographic PIV in the Wake of a Bi-stable Bluff Body with Zero Ground Clearance <i>Simran Singh Panesar , Hao Xia, Martin Passmore, Daniel Butcher</i>
15:40	Aerodynamic development of the New Generation DAF XG+, XG, XF and XD <i>Date Rentema, Rob Heijkant</i>
16:00	Coffee Break
Session 8: Two phase flows and aeroacoustics (Chair: V.Valeau)	
16:20	Developing Predictions of ADAS Sensor Impairment Using Computational Simulations of Tyre Spray <i>Conor Crickmore, Andrew Garmory, Daniel Butcher</i>
16:40	The Influence of Forebody Topology on Aerodynamic Drag and Aeroacoustics Characteristics of Squareback Vehicles using CAA <i>Harish Viswanathan, Kushal Kumar Chode</i>
17:00	Automotive Grille Fin Tonal Noise Induced by Parting Line Step: Simulation and Correlation Testing <i>Leon Brown, Hang Li, Kevin Disotell, Lian Duan, Rodrigo Auza-Gutierrez, Austin Kimbrell</i>
17:20	Fluid dynamic and aeroacoustic study of a generic side mirror using the STRUCT-e turbulence model <i>Jorge Munoz-Paniagua, Javier García, Eduardo Latorre Iglesias</i>
17:40	Reynolds number as a concept for aeroacoustic design <i>Florent MARGNAT, Wagner Pinto, Camille Noûs</i>
18:00	End of second day
Banquet	

Wednesday, June 14	
09:00	<b>Invited Talk : Coupling physics-based and data-driven models for the simulation of fluid/structure interaction: application to tire/liquid interactions modelling</b> <i>Dr T. Dairay Manufacture Française des Pneumatiques Michelin, France</i>
Session 9: CFD and modelling 1 (Chair: S. Krajnovic)	
09:40	Automatic grid refinement and DDES-SST: The right tool for automotive flows <i>Emmanuel Guilmineau</i>
10:00	A Comparison of Hybrid RANS-LES and WFLES Solutions for the DrivAer Test Case <i>Florian Menter, Ashwini Dalvi, David Flad, Andreas Hueppe, Alexey Matyushenko</i>
10:20	Sensitivity of scale-resolving automotive simulations to turbulence modelling, convection scheme and solver <i>Louis Fliessbach, Marian Fuchs, Hendrik Hetmann, Charles Mockett</i>
10:40	Multi-fidelity Reduced Order Models for efficient aerodynamic design <i>Fausto Dicech, Konstantinos Gkaragkounis, Lucia Parussini, Anna Spagnolo, Haysam Telib</i>
11:00	Coffee Break
Session 10: CFD and modelling 2 (Chair: E. Guilmineau)	
11:20	Embedded Body - Efficient Immersed Boundary Method for Predictive Aerodynamic Simulations <i>Sanjin Šarić, Branislav Basara, Clemens Müller, Zoran Pavlovic, Zoran Zunic, Peter Sampl</i>
11:40	CFD Prediction of Windsor Squareback Model at Yaw <i>Page Gary</i>
12:00	Open source tools for CFD automation <i>Wouter Remmerie</i>
12:20	Lunch Break
Session 11: Flow control 1 (Chair: V. Parezanovic)	
14:00	Active skin-friction reduction in the turbulent boundary layer of high speed vehicles <i>Xin Zhang, Xiao Hui Wei, Han Feng Wang, Yu Zhou</i>
14:20	Aerodynamic brake for high-speed trains considering lift force <i>Suzuki Masahiro, Nobuyuki Okura</i>
14:40	Drag reduction of a high-speed maglev train model based on steady jets <i>Genhe Chang, Bingfu Zhang, Jiali Liu, Lu Shen, Shunlin Tang, Yu Zhou</i>
15:00	On the design and test of enhanced flaps for drag reduction of blunt vehicles at different scales <i>José Carlos Muñoz-Hervás, José Manuel Camacho Sánchez, Manuel Lorite-Diez, Jose Ignacio Jimenez-Gonzalez, Olivier Cadot, Carlos Martínez Bazán</i>
15:20	Road test of an aerodynamic drag-reducing device connected to the rear-end of a small trailer <i>N. Mizrahi, O. Katz, M. Fromm, Y. Turgeman, B. Mizrahi, O. Drori, Z. Sudarskis, A. Seifert</i>
15:40	The Aerodynamic Benefits of Installing Trips on the Arms of Cyclists <i>Shibo Wang, Mark Thompson, David Burton</i>
16:00	Coffee Break

Session 12: Flow control 2 (Chair: Y. Zhou)	
16:20	Ahmed body drag reduction by means of different base blowing symmetric configurations <i>José Manuel Camacho Sánchez, Carlos García Baena, Manuel Lorite-Diez, Cándido Gutiérrez Montes, José Ignacio Jiménez-González, Carlos Martínez Bazán</i>
16:40	AI-based optimization for efficient drag reduction of an Ahmed body <i>Dewei Fan, Bingfu Zhang, Yu Zhou</i>
17:00	Analysis of the 3D turbulent wake behind a flat-back Ahmed body with base bleed using Stacked Stereoscopic Particle Image Velocimetry <i>Vladimir Parezanovic, Tauha Irfan Khan, Luc Pastur, Olivier Cadot</i>
17:20	On the potential of drag reduction using morphing bluff-bodies for ground vehicle application <i>Yajun Fan, Olivier Cadot, Sebastiano Fichera, Vladimir Parezanovic</i>
17:40	From on-road experiments to closed loop control of base drag variations for varying upstream flow conditions <i>Agostino Cembalo, Jacques Borée, Patrick Coirault, Clément Dumand</i>
18:00	<b>End of the conference</b>
